

Paris, April 21th, 2009

Dear Friends,

As promised, here is more information on our upcoming **International CEDH Conference** which will take place in **Lille, France on September 18-19, 2009**.

This conference will focus on three main areas :

- **Plenary sessions to discover, learn and broaden our thinking,**
- **Workshops to exchange ideas and debate about our clinical practices,**
- **A forum to have the pleasure to get together, continue our discussions,** and meet around poster sessions.

Volume 13 of the CEDH Magazine, which will be published mid-may, will feature the complete program of this exciting event. I am happy to present it to you in advance.

### **Plenary session**

The highlight of this session will be the awaited presentation by **Professor Luc Montagnier (Nobel Prize)** who will present his latest studies on « *nano-elements from pathogenic microorganisms* », meaning **the ability that water has to record and transmit information**. The title of his speech is « *Tomorrow's preventive medicine* »; he will share with us the hope that this work represents for the future prevention of several pathologies.

The plenary session will also give us the opportunity to :

- address two questions regarding the clinical practice of homeopathic physicians:
  - **What is clinical practice?** by P. Josset, M.D.
  - **What is preventive medicine?** by A.C. Marchand, M.D.
- And also **an update on clinical research with** Philippe Marijnen M.D., Projects and Research Coordinator for Boiron Laboratories who will report on ***The contribution of clinical research towards a better understanding of the mechanisms of action of some homeopathic medicines***

Finally, two physicians will present their experiences in **palliative and supportive care in neurology** (Fabio Bolognani - Brasil) and **degenerative diseases** (Vassilka Yurokova – Bulgaria / USA).

All plenary sessions will be videotaped and available online at [www.CEDH.org](http://www.CEDH.org) by October 29th, 2009.

## **The workshops**

Three workshop sessions are planned :

- One workshop session on Friday, September 18<sup>th</sup> in the afternoon
- And two sessions on Saturday, September 19<sup>th</sup> in the morning.

During **the networking workshops** the participants will be able to exchange ideas and discuss with the authors regarding the contributions available online at [www.CEDH.org](http://www.CEDH.org) (starting in July 09). A moderator will open and animate the debates.-

The **CME workshops** will consist of a one-hour presentation followed by 30 minutes of Q&A. Several French physicians are already familiar with these topics but they have rarely been presented to an international audience.

Each attendee can only sign-up for 3 workshops. The networking workshops will take place twice during the conference, and once with a simultaneous English translation. The CME workshops will only be proposed once during the conference with a simultaneous English translation .

*The highlights of these workshops will be available online at [www.CEDH.org](http://www.CEDH.org) starting in October 09.*

You will find below more information on the topics that will be addressed in the networking and CME workshops.

The program of the plenary session and the workshops might be subject to changes until July.

## **The Forum**

We will have a large Forum with exhibit stands presenting our international partner schools. This will be a great opportunity to get together and meet around poster sessions.

Finally a **gala evening** at the Congress Center will be the ideal way to continue exchanging ideas in a professional and friendly setting.

Jacques Boulet
